Board Game Description

Players: 1-4 // Time: 30 Min

Age: 10+ // Weight: 1.74

Forbidden Island requires that all players work together to collect four pieces of treasure and escape the island before it sinks. Players will take turns using a limited number of actions to move themselves around the island, shore up sinking parts of island, and acquire treasure. Unique character abilities, randomized island tiles, and multiple difficulty levels ensure that no two games are exactly alike.

Work together to grab the treasure before the island sinks. It's called 'forbidden' for a reason after all.

Forbidden Island
